

SINGLE & MULTIMODE BICONIC CONNECTORS

DESCRIPTION

Splice Technologies, Inc. is now offering high performance single and multimode Biconic connectors and adapters. These connectors are offered fully assembled for typical field installation, or un-assembled for factory fiber cable installation. Our Singlemode connector is supplied with a yellow color body, (coupling nut), while our Multimode version is supplied with a black color body.

Our bulkhead connector mating sleeve, (adapter), has a rectangular flange for panel mounting. These are black in color and designed to be used for both single and multimode connector applications.

FEATURES:

- ⇒ Meets EIA/TIA-604 1 A; FOCIS 1
- ⇒ High Performance
- ⇒ Low Insertion Loss
- ⇒ Color-coded Body
