MINI SERIES
FUSION SPLICE PROTECTION SLEEVE

Splice Technologies’ “Mini” series fusion splice protection sleeve is designed to fit in smaller width splice trays or splitter/coupler packages with an after shrink diameter of 2.0mm, while still accommodating up to a 900um diameter fiber. Stock lengths are 25 & 40mm, but also available in 15, 20, & 30mm. This product is constructed with an inner EVA meltable adhesive tube, stainless steel strength member and a polyolefin heat shrink outer tube. The tubes are clear to allow viewing of the fiber during and after splicing. This product has been proportionately downsized using the same core materials, formulations and manufacturing processes that are used in our “Standard” series product. The entire assembly is designed to ensure that all members maintain perfect alignment during shipping, handling and shrinking. We are proud to say that all of our products are made here in the USA and most sleeves are in stock ready for immediate delivery.

FEATURES

➢ RoHS & SVHC Compliant
➢ Outer tube meets SAE AMS-DTL-23053/5 Class 2
➢ Inner EVA meltable adhesive tube
➢ Full length strength member for total fiber support
➢ Close dimensional tolerances
➢ Open ended assembly minimizing possibility of air entrapment during shrinkage
➢ Operating Temperature Range -55°C to +110°C
➢ Packaged in 100 per bag
