## QUALITY POLICY

It shall be the policy of Splice Technologies, Inc., to continuously provide products and services that meet or exceed the quality expectations of our customers while maintaining our leadership in product quality reputation and customer service.

- Assure that all company employees understand and follow these requirements and are provided with the resources necessary for compliance.
- Assure that our suppliers understand and support our quality policy.
- Gather, evaluate and introduce current productivity technology and the best manufacturing practices which parallel our product line.
- Provide training in the skills necessary to achieve our manufacturing goals, and to provide employees with direct access to more detailed training for the implementation of specific programs.
- Continually measure productivity and seek continuous improvement in productivity in terms of quality, service and throughput.
