SPLICE TECHNOLOGIES STATEMENT REGARDING CORONAVIRUS COVID-19

March 24, 2020

To All our Valued Customers:

Splice Technologies is a major manufacture supplying the Telecommunication, Medical and Military industries, and considered an" essential business" as defined in the governor's order. We will remain at full capacity to service our customers during this pandemic. Our facility will continue to practice elevated safety measures for all employees.

We are doing our part to keep our employees and their families safe. We have staggered shifts, lunches and breaks to reduce the number of workers in proximity to each other. We have increased the cleaning of all workstations and our facility at large. We have implemented work from home where possible to further reduce the risk to our employees.

Thank you for putting your trust in Splice Technologies. We appreciate your continued business as we navigate through this unprecedented epidemic and wish you all good health.

Respectfully,

Robert P Auteri

A handwritten signature in black ink, appearing to read "R. Auteri", is positioned below the printed name.
